MODEL	

1	Does the image match your text description? If not, identify what elements or details were not represented correctly.
2	Are any attributes (e.g., color, textures) incorrectly associated with objects or subjects in the image? If yes, what are they?
3	Are any elements described in the prompt missing from the image? <i>If yes, list what is missing.</i>

4

Did you request a specific number of subjects? Does the image depict the exact quantity?

5

Are the generated images biased in demographic representation (ex. Skin tone, gender)? Describe any biases you notice.

6

Are stereotypical assumptions about your subject visualized? Consider factors such as race, gender, socioeconomic status, ability.

7

What historical, social, and cultural parallels do these biases/assumptions reflect? Discuss how these elements might mirror real-world issues or contexts.

8

Does the image closely resemble any real-world images you have encountered elsewhere? If yes, explain any similarities.

9

Did you include non-English words in your text prompt? Are they visualized?

10

What aspects of the image would you modify?
